COERA | We design, build and operate software products that bring business ideas to life.

Summer 2022 Internship | Java or .NET Software Engineer

This role would suit a Computer Science student looking for a **paid summer internship**.

Your day @COERA

- Design, develop, code and test software systems or applications for software enhancements and new products; revise and refine as required.
- You will be working with the latest technologies including: Java, Spring, MongoDB, Spock, Groovy or .NET CORE, C#, SQL Server, Angular/React; and other state-of-the art technologies.
- Participate in agile development of project, implementation design specification, system flow diagrams, documentation, testing and ongoing support of systems.

What You Need for this Position

- To study in a relevant field like Computer Science; with no more than 2 semesters until graduation.
- To be passionate about new technologies and their future potential.
- To be enthusiastic, self-motivated and curious by nature.
- To be a great problem solver, capable of working both independently and in a team and willing to learn from our colleagues
- To have proficiency in English.

About the internship

- **Application deadline:** 30.04.2022
- **Duration**: from 6 to 8 weeks
- **Starting date**: July 2022
- Hybrid (remote & on site) internship program
- **Fully remote selection process**
